## Involution and Evolution

Eugene 25.01.1970

Involution is evolution other way up.

Evolution being something out from a situation or substance.

A 'term' implies a word that has been very clearly defined.

How can the qualities that are evolving have got in the first place into it.

Reality is original = essential powers.

Involution = towards the centre

Evolution = from the centre.

Men looking for 'primary causes' ie forces - ie dynamic cause.

- also looked for unchanging forms and considered:  
earth, water, air, fire.

2 temperaments opposed.

A Stability looked for unchanging matter

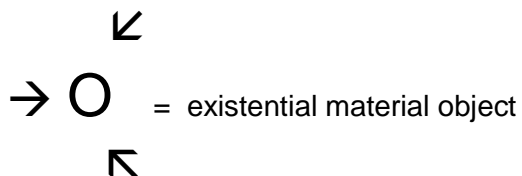

B Causation looked for dynamic cause

Matter = energy locatable and offering resistance.

Governing concept of Involution

= directing flow of energy

field - zone of influence

Local zones of compaction, due to spacing between energy, called precipitated energy or material.

If we release energy from compacted state, we will reaffirm original attributes of pre-compacted energy

[2]

Field of intelligent energy, condensing in field = zones of resistance.

As

Materialistic empirical scientist, concentrates on examination of matter. (gross material matter)

If we define as 'real' only that which our sense organs can perceive, we will put ourselves under concept of granularity.

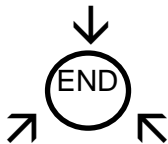

At top level we are dealing with a continuum which is more powerful and sensitive than those powers so far discovered.

=====

Industrial revolution philosophy denies all psychic forces, and says that only is real which one can touch or see.

Moon is regarded as 'dead end of involution' - ie minerality has contracted as much as it can.

E = field )  
N = motion ) An involutory movement carried to its term.  
D = division, dividing itself )

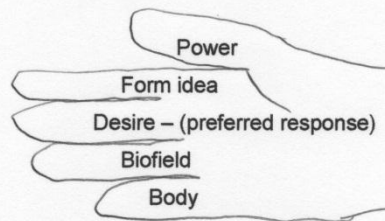

Effective = Ex factive  
out to do

\_\_\_\_\_

Self-condensation = incarnation

[3]

Thumb (pusher)

Power in philosophy = push, that which produces motion.

Field = area of influence

Man = evaluator

Field of power = self evaluating pusher.

Index finger (form ideas)

Form = shape as distinct from concept of substance.

Formulation = idea

Form pertains to intellect

Middle finger

Preferred response

- this is result of the investigation of forms.

This is the action of the power on the form.

The

Biofield

Field of life for the preferred form.

ie interest

we wrap a certain amount of energy round it

it is a field of life energy.

Energy so devoted is a biomagnetic field.

Ingestion, involution of field energy results in physical body being involved within biofield.

[4]

Body

There is a measurable biomagnetic field wherever there is a living body. This field does not emanate from the body but is the course of the body.

The biomagnetic field will always show preferred responses within it.

---

All forces which condense as lions, elephants, men, etc, condense in that way because they have a preferred response from inside them.

---

The field power, which is the origin of all things, mysteriously is structured.

~~Sameness does not mean~~

~~Also time zones~~

The will to differ is common in all zones.

The precipitation is unique in every zone.

Therefore formally identical conclusions will not occur.

If one wills not difference but identity it is possible to resonate in the same way.

If one agrees with someone it is because one wills to agree.

Eternity is not a lot of time.

it is not serial time or energy emission  
in a cycle of observation

Father	-	thumb	gen
Son	-	forefinger	
Holy Ghost	-	middle finger	
Life	-	fourth finger	
Body	-	little finger	

[5]

Love God and your neighbour as yourself etc. does not mean like mindedness (formal agreement)

Right from beginning of Christianity we have many different points of view.

Heresy = "I do my own thinking".

Beings that know they are wilful in their definitions (Franciscans).

Beings that believe idea conditions them (Dominicans).

Our life is a BIAS

- Disagreement is highly intelligent Xranity *[sic. – no suggestions]*.

God the father does not want a world full of individuals saying exactly the same thing.

Animated principals.

Evolution - means we must bring out of our being what is in

God is simultaneously anti-fascist and anti-communist.

Oligarchs would like people's preferred responses to be those that are defined for them.

Higher level govt. squeezes people to make them produce new emergents.

- ie enclosure of 'common land' by defining it as 'waste land', resulted in *lotons [unclear word]* beings formed and allowing the industrial revolution.

[6]

Initiative requires the overthrow of inertias

Caste System of people stressed on:-

- i)           Body            ) -                   inertia people  
              )               - commodity distribution people (inter-reaction)
  
- ii)           Biofield        ) -                   gentle artistic  
              )               - ~~inter-reaction~~ — businessman
  
- iii)          Preferred Response -                   warriors
  
- iv)                            Form-                   Brahmins
  
- v)                            Power                    -Quintessential being.  
                                  pure self conscious power cannot be  
                                  defined because it is not form

The inter-reaction of body and biofield aspects gives rise to businessmen.

In

\_\_\_\_\_

Evolution - we are in process of moving back from physical body to origin.

Generality of present day evolution - most people running about on preferred responses. Very few people are running about on formal logic.

(these are often called 'abstract mathematical thinkers')

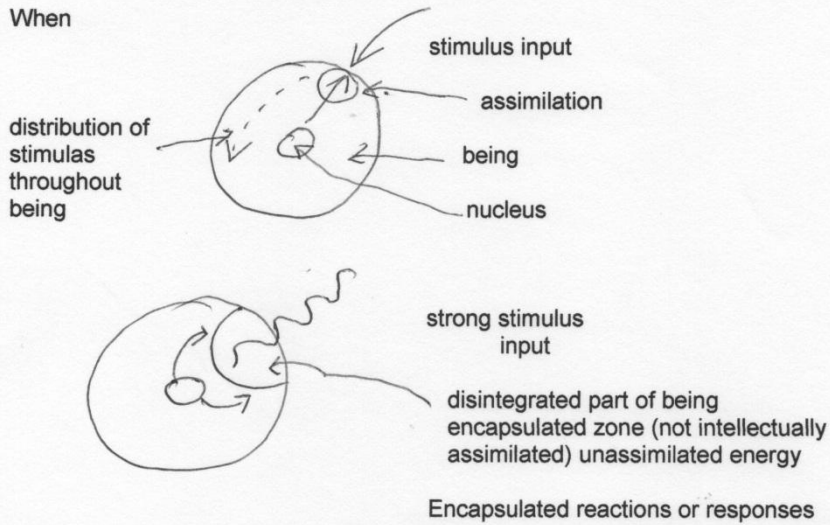

Our physical body is centre of infinite field of sentient power, itself uniquely structured from within the field.

[A/1]

Preferred responses and non-preferred responses

(engramic - .. )

When

Ease of assimilation is no guarantee of ultimate truth.

We must have control over a term, or we might passively react to the term.

The battle which existed between H and D exists today:

Heraclitus - dynamic field energies

Democritus - quantum theories

Provided stimulus is not too powerful, a being will assimilate the energy coming into it.

Tillich said "you are a being, therefore unique".

[A/2]

Therefore because you have the courage for function you are going to have courage to think and speak for yourself.

To think there is only one correct solution is a concept of granularity.

When you insert energy into an organism too quickly

( A (L) L E R T                      = All work  
(  
( ALL ERT  
    \_\_\_\_\_

If you are alert

\_\_\_\_\_

There is no dislike in the continuum.

If you invade the zone of disliking means strict internal honesty.

Ultimate reality is dialectical

- you hate as much as you love

Therefore you must not reject parts of yourself.

A baby is born

Morality ) makes walls divisions

Wall ality ) - society is walls

You are at war between the divided portions of yourself.

All you need is an emotive negative response to justify internal investigation.

Break it down to its ultimate complex of will.

“Their name is legion”. All ideas work as if they were separate entities.

[A/3]

Egotism = the preferred response.

The preferred response continues for all eternity.

The person at the level of preferred response knows nothing whatsoever about free will.

Motive = motor driving because of form.

Form within desire which determines relations.

If one exposes oneself to desire and are very sharp, one will become informed about form of that preferred response. At level of free will one penetrates to meaning.

-----

Pri	Priest has formal knowledge about preferred responses ) ) )	Note pure energy response + pure love of form, makes hybrid priest king. (or free will)
Energy	Warriors (kings of old) Has preferred response ) )	
Beauty Appreciators	Very aesthetic arty people who allow beauty to sweep into them	
Knee benders	People	

fundamental idea of ring finger is that that finger is most useless. Therefore if one is going to decorate any finger one might as well use that one.

[A/4]

Free-will is not doing 'what you want'.  
It has nothing to do with want.

Grace is equivalent to spirit.  
It cannot be demanded from below.

No prayer is without effect.  
Prayer is energy.  
But empirical ego cannot determine the effect of any prayer.

-----
