

This transcript of Dr Fred Freeman's notes for Eugene's lecture at Parklands on 23rd September 1969 was by Eleanor Grundy and Alan Roberts in October 2009 - all additions to the original put in by us to aid clarity are in square brackets and italics. At the time of writing this transcription there is yet no tape recording of this talk.

[1]

(Lecture by Eugene Halliday @ Parklands) 28/9/69

Centres in the human being attached to various parts of the body

(Note) philosophy - we have no history of philosophy stating progressive evolution of truth.

S = feeling, which is basis of all knowledge, means perceiving substance of knowledge infinite field of sentience.
– – because we cannot define S
S has not *[sic – no]* limits *[therefore]* cannot be defined
[therefore] is infinite.

S - when articulated is consciousness
SCI from cut / shear
an analytic process
if not analysed, one has not got consciousness of internal sentient of being.

- when we define a situation, by definition we then become more in charge of the situation.

- only when we define are we conscious, what we do not *[sic]* define consists of matters of which we are unconscious.

S is that in which phenomena is presented
- seeing is the defined tyrant, for that is *[the]* means whereby one define[s] contours and objectives.

- seeing is means whereby we can think geometrically, and look for significance in the object.

P = phenomena, perception, predication

S = field is not finite and *[therefore]* infinite
noumenon = made of absolute definition.

Any sentient being can be represented by S

Any positive being can be represented by P

[2]

Binary numbers are allowed only 1 and 0

Similarly in philosophy we could use S and P

P = patterns

Primary particle, pluralised and then posited in patterns = phenomenon.

= play, pattern

Buddhists say - only sentence is non-conditioned
only P is conditioned.

P = form

Prison = forms posited with *[in]* sentence

3 Fold Division

O = circumscription

[therefore] SOP

= original SOP from which earth created (ancient word for wisdom)

also written:-

= S = external subject around which phenomena are posited.

3 fold division of human being

zones of interrelation between positing tendencies.

[therefore] zone of interference between S and P

= - where one emotionally suffers from necessity of choice

energy thrown onto centre from a periphery bounces back from initiating though.

[therefore] zone between S and P

S is free and finds it's easier to influence
P from above

[therefore] head is lifted from body to give it opportunity to consider free
from unconsidered impulse.

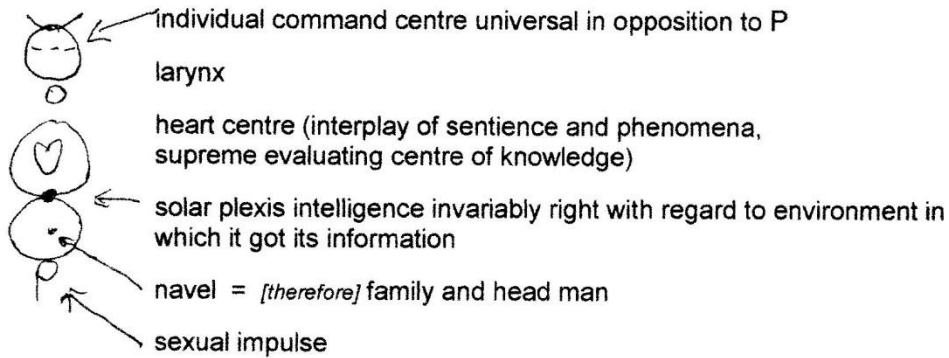

S

[3]

5 Fold Division of Man

6 Fold Division

heart pivotal centre for all other processes

Sub divisions are for our insufficiency

The only reality is 'whole reality'
all abstract definitions and [therefore] less powerful than whole.

In terms of efficiency

The more you know about something the better.
The more free energy one has the better.

[4]

H I E R O S = the ancient word for priest

H = power, control

= differentiation of power = expression

more power in differentiated mind, with knowledge of formal facts and freedom from emotional stress.

Creation

Creator

Crater = mixing bowl, to separate people from what they want and they say 'find it'.

One cell from living organism

Monocell has no internal sub-divisions.

Paramecium [*sic - paramecium*]

Human evolution is movement to produce pluralisation with each posited being in S being Absolutely self-determinate and absolutely reflexive, human race still has a long way to go towards these evolving cosmic being's evolutionary purpose. Only way is heightened awareness in being.

Belly being cannot get away from herd.

Note this being

Christ had come to destroy certain facts [*facets*] in the world – he denied terrestrial relations of family order to be valid. He was pro logos and anti family.

Buddha also broke herd instinct. Every point must be self-determinant.

Man who does not study Vietnam etc and he presumes to speak about it and vote about it, he is a fool.

[5]

Evolution will wipe out all non-self-determining [ed]

After World War III men will receive such a shock that every person will have to take a hand in own good. He will not be able to sit in house and be satisfied to put a mark on bit of paper.

Terms in relation to 5 fold division.

Physical body

Physbod = made of minerals from earth by a certain agent. It is a fact that the minerals that lie inertly on earth are picked up by plants and recomposed into growing plant. This requires light.

[therefore] above level of physbod there is a force that organises.

Biofield - organises mineral world in vitality force.
intimately connected with solar radiation

this collectivisation power must be considered "as circumscribed energy system" [therefore] by definition it is a body.

Body is any zone that can [. . . non-concluded sentence]

- " - Vital organising body

We have not only a vital organising complex of bodies, we have a mobilising or activity body.

Active Mobilising Body

- These forces that causes us to run about. It is one over pla [plant]

[6]

Mineral is entirely gravity dominated

Plant defies gravity and stands up

Active mobilising body
is superior to plant it can pull up plants etc

Mental Body

- Able to calculate where to run to person who can evaluate his desires, is superior to being that must rush about.

[therefore] there is a definite climb in power and efficiency.

Physical body

Vital organising

Active mobilising

Mental

- BODHI - is superior to others and is able to determine from within itself the entire possibilities
real *[realm?]* of cosmic intellect
able to work without mental stimulation.
contains internal dialectical principle of cosmic intellection. It knows that all involution caused by self positing.

Bodhi covers everything that is definable, beyond which is only that which is undefinable or infinite.

BLISS Free spirit
Cosmic intellection *[?]* - the absolute triad
above lower

Until you can integrate your personality, you are not yet ready for the higher triad No.7

[7]

Personality is empirical

When man has made his mind empirically very cleverly, and is ready to dedicate himself to absolute service, then the whole

The moment a very clever personality decides he will not use his own cleverness in his own purposes he cannot rise to higher levels but when he decides not to do so, the internal divisions within him disappear.

If *[the ?]* transfiguration of Jesus

Spiritual triad beings use man's private cleverness to further their cosmic purposes

Omnipotence to nescience to being saturated with cleverness so that he can dedicate his cleverness absolutely to cosmos

A being can only be of real service to the spiritual triad which can remove necessary dividing line of private purposes.

Whatever he has done has enriched cosmos and offers it to infinite and in process of offering it to absolute he wipes out difference between hi self and absolute.

Pearl rolled out of circulation in cosmos to recognise that all things have authority over things with authority over them except top and bottom.

[8]

Questions on Talk

ATMA)
BUDDHI) The triad above the personality
ATMA)

ATMA - object by letter symbols to define metaphysical symbols in which every letter has a meaning. Showing that there is a logical and ontological reason.

A symbolises - Absolute

T symbolises - insection [*intersection ?*] of forces in absolute implies stability of substantial power because circumscribed
[*therefore*] material
ma = appetite

MA means yourself
[*therefore*] - essential appetite of man is absolutely same as absolute

every being constitutes fodder for every other being

- ie every eater is edible
who shall eat who, when, where and for what crime

absolute is eating absolute

intelligence of man is intelligence of absolute a KNOW ABLE being.

ATMA is BRAMA

in every man there is a point of reflection on self awareness that gives every man the absolute right to oppose every other man talking absolutely

[9]

BUDDHI = pure logic or logo logic
(derived not from self-stimulus but internal self knowledge)

P = MC^2 (made nuclear bomb)
power derived from own power with dominant situation [?]

MANAS

Substantial, motion issue
(origin of word mind, mensuration the mind counting process than will apply itself to external world.)

process of two-way flow is already MANAS before it starts

This manas process controls glands in human body. By means of this inter-communicational squirt being become aware that it is a self-stimulating being. It is aware that it is [a] self-precipitated will to do something.

= peripheral stimulation possibility of touch, without prior consultation.

This is cause of all unease or disease
[therefore] 2-way squirt may occur without prior consultation,
this is human communication

contingent stimulation causes mind to withdraw or shrinking

shrinking is an empirical response to an empirical

all diseases caused by some shrinking from some stimulus

[10]

= glyph of letter 'K' knock is to help

external stimulus

KAMA MANAS

lower mind

that mentation process which is conditioned by your appetite being outside you

- ie you have been captured by the stimulus
- ie cupidity or stupidity

a person is reacting because he has been touched or effected

absolute self-stimulating being

MANAS

KAMA MANAS = the fall or subordination to the external stimulus

This is the school of Zen, decide you are a centre of creative values.

If you close your mind to external stimulus, is to allow original manas or self-stimulation to function.

[Therefore] every being must learn not to be a slave to external stimulus.

Obsolete = functions that stand in orbit.

Chemical changes in body are precipitated by act of will.

[11]

- A absolute)
• posits a point) = AL [or A1] or Ai

posits many primary particles to serve as many particular centres or reference. These particular particles are masses of matter with which empirical science is concerned.

material

plants

animals

men

reflexively aware men termed "divine men".

5 vowels signify 5 levels of being within evolutionary intent of absolute

A - absolute

I = absolute individuated

E = absolute individual then has possibility of evolution

prior to pluralisation absolute has no possibility of relationships

where you control desires, the energy differentiates you instead of going outside you.

fall is involutory process

way back is evolutionary process.

-
- A T M A - absolute cannot get rid of itself.
it must do something with itself as the absolute he is a creation
as a result of his creative process he [..... sentence incomplete]

[12]

Logologically 'highest mercy is greatest severity'.

NO = negation, continuity of process of circumscription

"NO escape" means the escape is by saying "no" to the slavery of the external stimulus

Charming - is to help people in slavery to the external stimulus in the process you will get wiser and wiser.

so called success in this world consists of finding out what people want and then supplying it. Danger is that in the process one may become dependent upon the external stimulus of their needs

pain is a psychological point of refusal of stimulus.

all energy is sentience
electrons in orbit are bored
by jumping orbit they break boredom

to increase active possibility is to increase joy potentialities

where it becomes unprofitable to endure pain one faints.

SACRIFICE = secret doing

patterned energy
survivor is some protoplasm of person who is sacrificed [therefore] his protoplasm vibrates in tune with patterned energy of sacrificed physical level human being and are conditioned

[13]

in one direction but feed back is in opposite direction.

SACRED = SECRET and unassimilable.

26/10/69 *[probably date of next meeting]*
